## CHOKING

COMPLETE / SEVERE AIRWAY OBSTRUCTION Ensure Safety for Self and Others

Dial Triple Zero (000) for an Ambulance

Child and adult: Back blows lean forward. Chest thrusts upright, use your other hand to hold them or position against a stationary/stable object so you don't knock them over (e.g. wall, in a chair etc.)

Infant: Back blows - head downwards so gravity will assist with expulsion. Across your lap/thigh or over your arm. Chest thrusts – turn over.

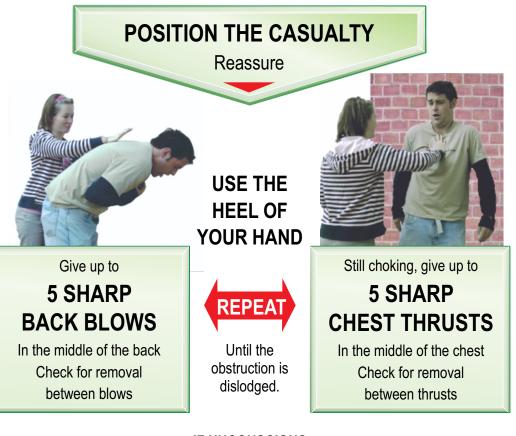

This is one method for infant- if having to act quickly where no seat is available to allow for positioning over the first aiders thigh.
